Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 37 and 54 – 60, drawn to a multilayered film, classified in class 428, subclass 35.9.
 - II. Claims 38 – 52, drawn to a process for forming a multilayered film, classified in class 264, subclass 177.2.
 - III. Claim 53, drawn to a process for forming a multilayered film, classified in class 156, subclass 78.

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process, such as the lamination of pre – formed films.

3. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the the product can be made by a materially different process, such as the co – extrusion of films.

Art Unit: 1772

4. Inventions III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it is not necessary for the attachment to be extrusion. The subcombination has separate utility such as an attachment comprising lamination.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

i. A multilayered film comprising a nylon film, silicone oil and a sealant film (Claims 1 – 17 and 54 – 56).

ii. A multilayered film comprising two nylon layers, an ethylene vinyl alcohol layer, and a sealant layer (Claims 18 – 28).

iii. A multilayered film comprising one nylon 6, nylon 66 or nylon 6/6,6 layer, and a sealant layer comprising ethylene vinyl alcohol (Claims 29 – 37).

iv. A multilayered film comprising one nylon 666 layer, and a sealant layer comprising ethylene vinyl alcohol (Claims 57 – 60).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

Art Unit: 1772

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. Roger Criss on June 16, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1772
